bio**boxes**

Peter Belmann
@_pbelmann_

Dublin BOSC 2015

What is bio**boxes**? (1/2)

motivated by docker-based benchmarking projects

CAMI & nucleotid.es
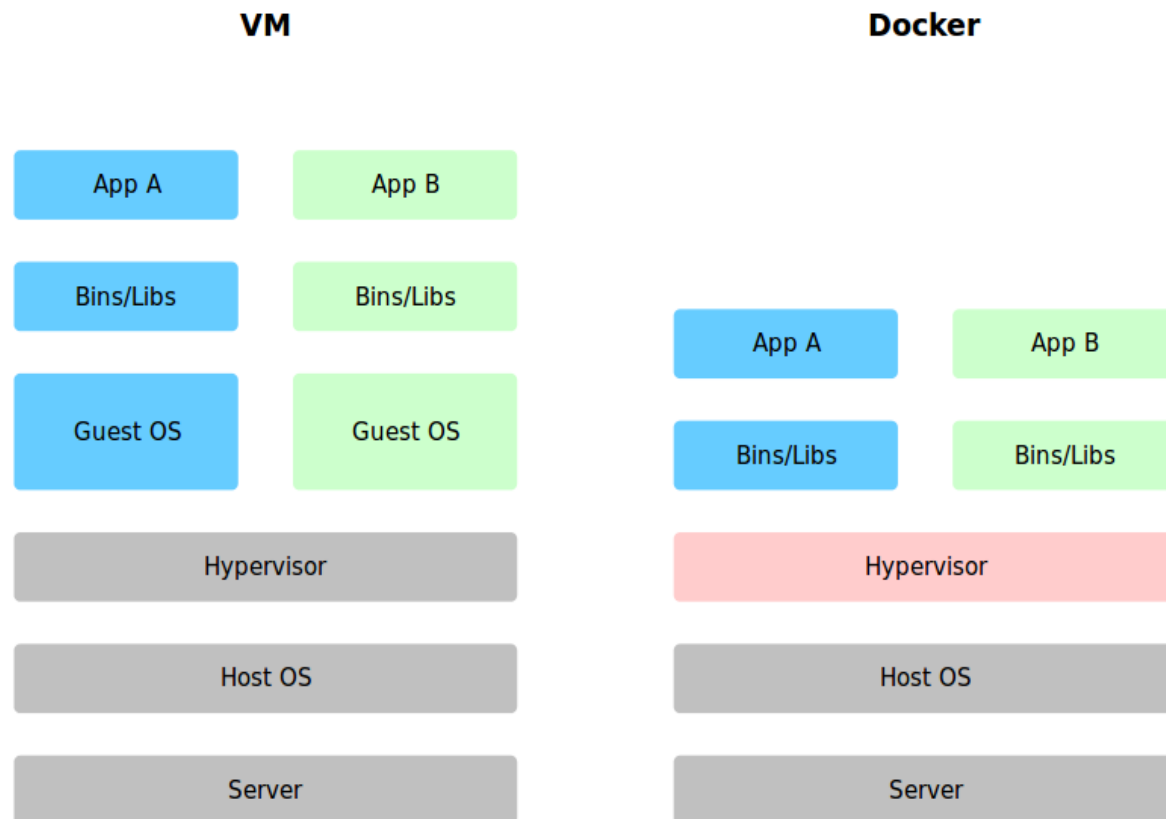

Reproducibility
Easy to use
Continuous Evaluation

a standard for creating interchangeable bioinformatics software containers
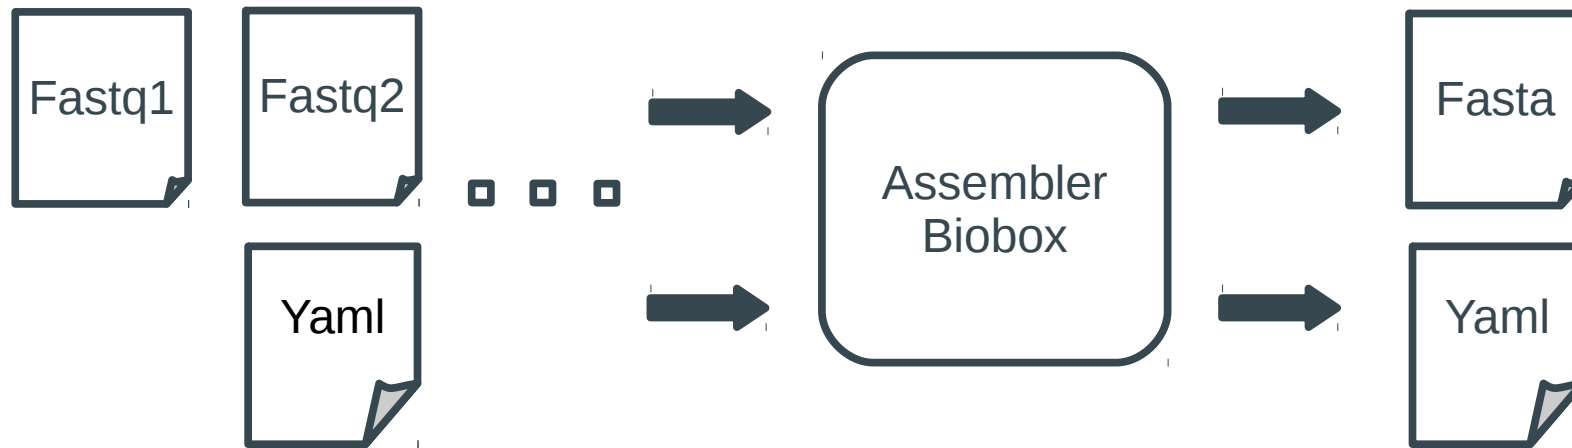

What is Docker?

allows creating software in sharable containers that anyone can use

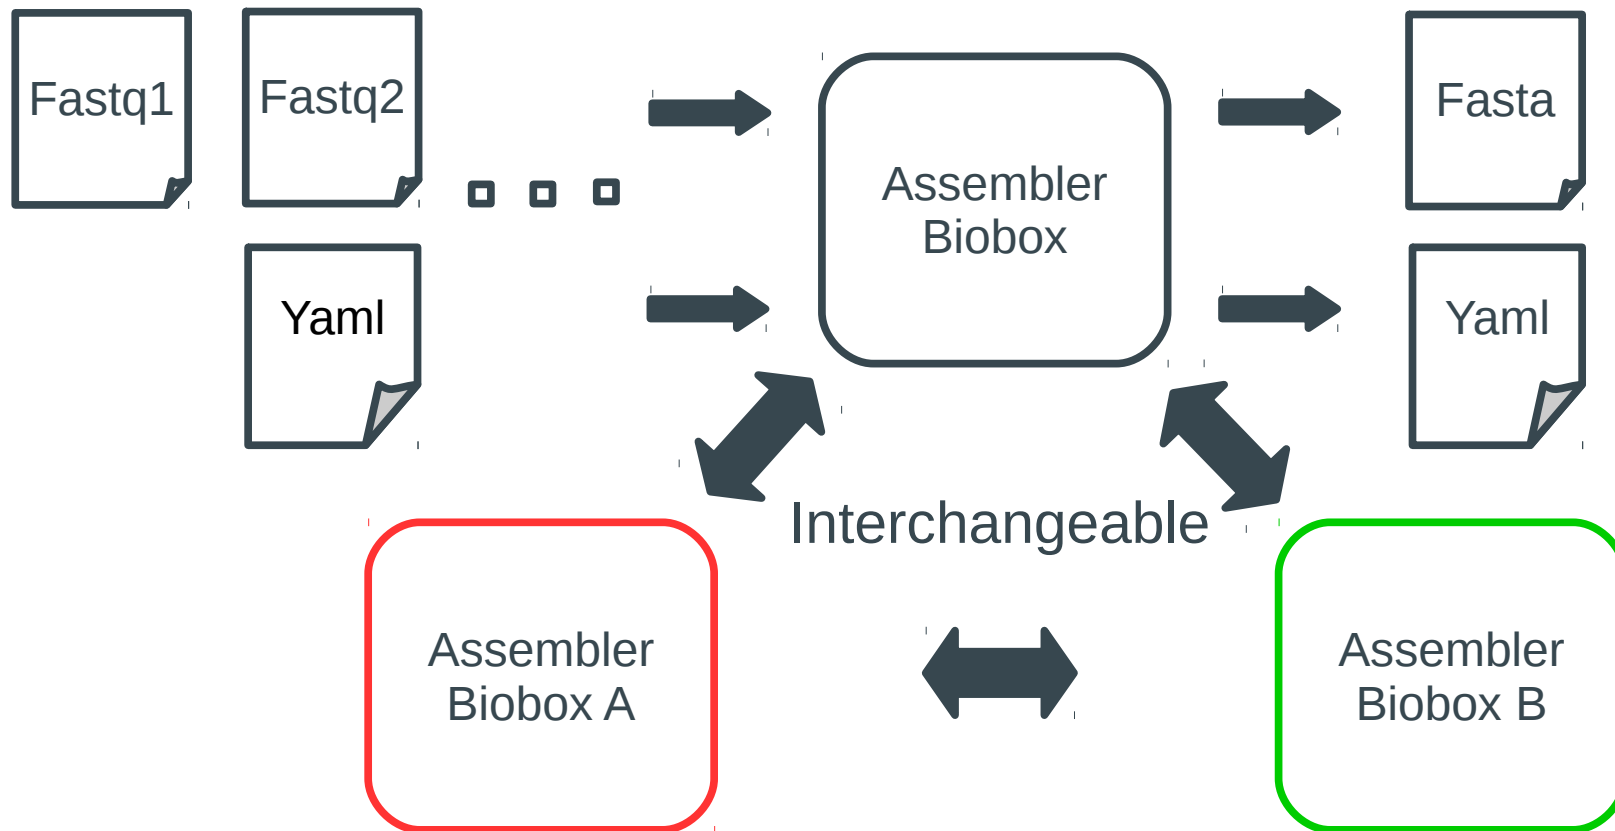

solves the problem of "it worked on my machine"

How does bio**boxes** work?

How does bio**boxes** work?

we want the bioinformatics community's input
